

RentalTrader - software for Scaffolding, Formwork and Temporary Fencing rental companies

RentalTrader is a web based, specific business management software for companies, whose business activities are inventory rental, trade and logistics.

Scaffolding, Formwork, Tower and Temporary Fencing rental companies have some unique hire and rental requirements specific to their business sector:

- Generate mass rental invoices for client and object for a specified time period.
- Create rental agreements with possibility to set prices for each item separately or for the whole amount of rental goods together per day.
- Possibility to check each item rental history – track the objects they have been at.
- Keep record of warrants for client persons and check their expiration terms.
- Plan transportation services from the stockyard to the object and/or the other way around.

RentalTrader provides all these specific needs, plus the standard rental functional needs and more!

RentalTrader is a fully web based software, multi platform and easy to use on internet or local network!

All you need to use **RentalTrader** on your computer is one of these web browsers and platforms:

*If you are in this type of business, then **RentalTrader** is created just for you!*

With RentalTrader it is possible to optimize activities in the following areas:

Clients

Detailed record-keeping on clients and persons with signatory powers;

Record-keeping and control of authorisation validity term of persons with signatory powers;

Record-keeping and control of communication with clients;

Possibility to add client to any of vip or debtor groups, which ensures placement of additional reminders and prohibitions upon goods dispatch or preparation of outgoing documents, for example, in cases when client continuously does not settle invoices or when it is necessary to check the returned goods thoroughly;

Possibility to notify client via e-mail on special offers, discounts or unsettled/delayed invoices;

Possibility to enter detailed information on each object of client and to state sub-objects;

Possibility to enter several objects and branch offices of client, where rented goods will be delivered;

Possibility to operatively prepare an overview on rented materials in client's objects.

Create user account for client in softwares public part, so client will have online access on its own reports of rented materials in objects, invoices, rental agreements.

Rental of goods

Print Rental Offer, list of materials and Rental Agreement with added list of goods. View or edit its details;

Automatic generation of rental documents by selecting list of goods and rental rate;

Change of status of the rental document: offer, reservation, active (goods are handed over to client), finished (goods are returned in warehouse);

Computerised generation of delivery notes upon dispatch and receipt of rented goods in warehouse;

Possibility to keep records and control the flow and cost of damaged goods and goods to be repaired;

Easy to generate bills for renovation to client and possibility to write off damaged goods.

Automatic generation of rental invoices on rented materials to all clients for selected rental period.

Goods & Warehouse

Detailed list with information on goods in warehouse:

- Quantity in warehouse;
- Reserved quantity and link to Rental Document;
- Rented quantity and link to Rental Document;
- Link to report on objects, where rented goods are located and rental history;
- Link to goods purchase documents.

Detailed description of goods;

Possibility to arrange goods by categories and groups;

Possibility to place goods in a web catalogue (optional).

Planning and record-keeping of transport services

Record-keeping on car fleet and setting of rates (rate per km and hour) for each vehicle;

Visualized flash calendar of planned load and unload times in warehouse;

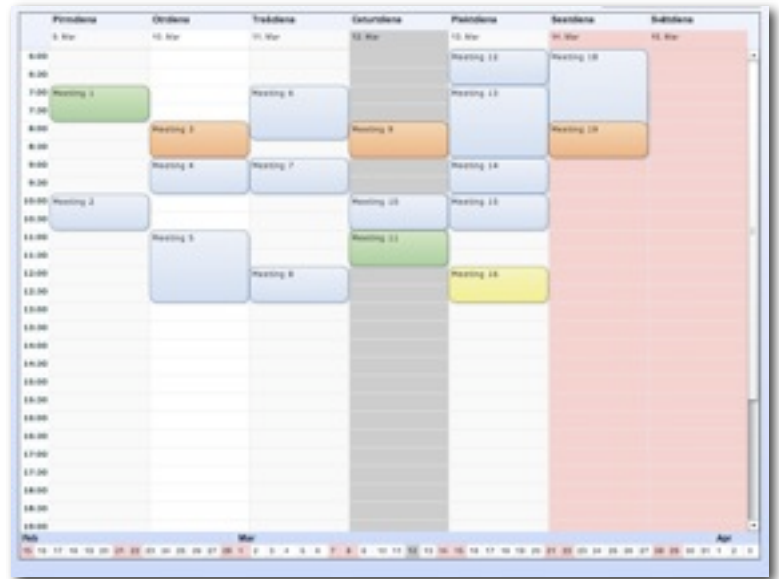

Planning and record-keeping of transport services (detailed record-keeping of time and km);

Linking transport planning with warehouse operations – information on status of client orders;

Possibility to control provision of services (ready for loading, loaded, vehicle on the road, vehicle returned, etc.);

Automatic generation of invoices for rendered transport services;

Detailed reports on transport services and cargo volumes.

Agreements

Easy to create and print out long term agreements and control agreements validation terms.

Create and change standart agreement forms.

Financial information

Viewing and printing of income, expenses and turnover reports;

Possibility to see reports in different sections by selecting particular period, client, warehouse, group of goods, manager, etc.:

- Profit / Income / Turnover;
- Transport services / time / mileage / volume of cargo transported in tonnes / driver work load;
- Report on debtors;
- Unpaid bills of lending;
- Report on materials in warehouse;
- Other reports

Record keeping of fixed assets, depreciation, reports.

Transfer all selected invoice data to accounting programm in next minute when invoices are generated.

One step ahead

Using wireless connection and wireless barcode scanner it is possible to optimise warehouse operation time on controlling delivered and received materials in each rental agreement. Warehouse worker just need to scan rental agreement code, an item barcode, and enter amount. So the delivery note with actual item amounts will be ready to print out at the moment when the truck is loaded or unloaded.

The first version of the software was developed in 2003 and each month new features are added.

In our software RentalTrader we provide opportunity to add new languages for interface or change text in existing languages. It is possible to choose interface language for each user individually.

With the progress of our client's businesses we as well are developing our software and adapting it to the client's business processes changes and expansions. By purchasing this software our clients get one of the most advanced online solutions for the rental business in Europe and worldwide.

*If you would like to receive additional information on the software **RentalTrader** or schedule a software presentation, please contact us on +371 67788055 or email at info@norgate.lv!*

About us
